REPORT OF FIRE DEPARTMENT

The Fire Department responded to 20 fires in 1949, 3 out of town and 17 in town.

Loss of buildings amounted to 1 house, 1 barn, 1 garage and 1 brooder house all at different locations.

Source of income for 1949 was solely from membership dues and donations, membership amounting to 125 residents and non-residents.

Actual maintenance costs of building and equipment, insurance, fuel, light and telephone are paid by the town; equipment and repairs by the Association.

At present the Association has \$1,000. in interest-bearing savings awaiting such time as funds are available for the purchase of a new truck.

SUMNER A. HAYES,

Chief.

We were again fortunate in securing Hon. Chester E. Merrow as speaker of the day.

We hope that at a not too far distant future that the Old Soldiers' graves in the Town of Barrington may be cleaned from brush and undergrowth; some of cemeteries are almost impossible to find due to these conditions. One hundred and thirty flags were placed on graves in all parts of the town which has taken time and hard work to carry on this worthy project.

This report is submitted to the voters of the Town of Barrington by Hanson-Keliher Post No. 6804, Veterans of Foreign Wars.

HAROLD W. HENDERSON,
Chairman.

FREDERICK M. RAMSDELL,
Commander.

LEO C. LOWERY,
Quartermaster.

REPORT of SUPERINTENDENT of SCHOOLS

TO THE SCHOOL BOARD AND CITIZENS OF BARRINGTON:

The present organization of the schools is as follows:

<i>Room</i>	<i>Grades</i>	<i>Teacher</i>	<i>Pupils</i>
Primary	1	Miss Florys E. Smith	30
Intermediate	2, 3	Mrs. Mina F. Sanders	37
Additional	4, 5	Mrs. Sarah E. Huckins	28
Grammar	5, 6	Mrs. Frances K. Wood	33
Junior	7, 8	Mr. Walter E. Barrett,	
		Principal	28
Musie		Mrs. Esther B. Coombs	
Total			156

There are 32 high school pupils attending in Dover, 21 at Spaulding High in Rochester, 1 at Austin-Cate Academy. The school census forecast for those entering Grade 1 is as follows: 11 in 1950, 17 in 1951, 17 in 1952, 18 in 1953, 23 in 1954, not less in 1955.

Another workshop, this time in Conservation Education, was held at Barrington School for Supervisory Union No. 44, September 19-21. Under the leadership of 15 experts from state departments and organizations specializing in this field, the teachers and others attending studied subjects and conditions connected with water, soils, wildlife and forestry, by means of moving pictures, reference books supplied by the state library, and field trips to places in Barrington, Dover, and New Durham. Mr. Russell H. Leavitt, Chief of the Division of Instruction, State Board of Education, and Mr. John Dodge of the Fish and Game Commission were active as leaders during the entire time of the workshop. While the teachers were assembled at

the workshop, the loyalty oath required by the state law was administered by Henry W. Locke, veteran justice of the peace, in an impressive ceremony.

As a result of the legislature's reduction of the amount of state aid appropriated to schools, Barrington's share was reduced from \$11,924.79 last year and year before to \$2,726.78 allotted for this year and next. As the school board's budget had been passed by the annual district meeting, the resulting assessment had to be met by increased local taxation on real estate. A broader tax base, using new forms of revenue derived from other elements of the population, would enable the state to discharge its proper responsibility for the schools and also provide other necessary services which the people are minded to secure. Action on an improved teachers' retirement bill was deferred; but with both political parties committed to its accomplishment, it is reasonable to expect early and serious attention. Included in bills passed are the elimination of the dog licenses as school revenue and a provision that articles to be placed in the school warrant by petition must be presented to the school board by February 13th.

The school nurse's report by Miss Myrtle Fletcher lists 10 kinds of physical defects noted in the course of the regular examination of 147 pupils. Ninety-nine notices were sent and 40 home visits made in the effort to impress upon parents the need of care and treatment. In a certain number of cases, correction or improvement resulted. Chicken pox was the most prevalent communicable disease. All pupils had been vaccinated. The nurse accompanied children to two out-of-town clinics. Pre-school children scheduled to enter Grade 1 in September were rounded up, checked for health conditions, and registered last spring.

The school lunch continues to be successful, with the willing cooperation of all the helpers mentioned in my last report. Improved facilities include a potato peeler and resilient tile floor in the kitchen.

It seems to be the fashion to make loose charges against the public schools. "Our Public Schools Ignore Religion" is the title of an editorial in a prominent newspaper of the state. "Purchase of Textbooks a Racket" shouts the representative of a New Hampshire city outstanding for the number of its citizens devoted to the interests of the schools, and whose superintendent occupies a leading position in the esteem of his associates. "Highschools Archaic" is the theme of a sensational article in a national weekly whose founder became famous for his moderation and good sense. Such canards are plain false witness.

Where do most children learn the Lord's prayer? Where do they hear the Bible read oftenest? Our teachers are devoted to character-training every minute of the school day. Their insistence that children of all faiths should live and work together in peace and harmony is constantly building a spiritual foundation of good-will which is the support of all true religion.

Textbooks constitute one of the smallest fractions of the school expense dollar. The educator's code of ethics forbids him receiving one cent of commission on their adoption or sale. The textbook companies are almost without exception old and reliable firms. They spend large sums of money on research and employ the most skilled teachers as their authors. Competition in this field is brisk, resulting in books that must be good, and also reasonable in price. The power of each school system to choose textbooks adapted to its own needs is one of the most important elements in the local control of the schools.

Evidence that our high schools are keenly alive to the necessity of adapting their programs to real life needs is seen in the fact that throughout the nation high school attendance doubled itself over and over again for several decades. It is now the exceptional child in Barrington who does not go to high school. Practical vocational courses are offered in variety, while the more academic subjects are suddenly found to be of supreme importance in maintain-

ing our cultural and technological survival in this atomic age.

Professional school personnel should not be allowed to stand alone in defending and strengthening the schools. Self-interest and the national welfare demand that business men and farmers, professional people and housewives should unite in demanding that an adequate share of our state, local, and national resources should be devoted to maintaining the schools as the chief agency in preserving our American way of life. Barrington was represented at the State House meeting, in which the Citizens Commission for the Public Schools was formed in New Hampshire, also at the regional school boards association meeting in Dover and the State School Boards Association meeting in Laconia, at all of which laymen in education took the most prominent part.

All of our teachers holding over from last year took summer school courses for professional improvement.

Respectfully submitted,

CHESTER W. DOE,

Superintendent of Schools.
